

Introduction

XML Schema is used to describe and validate the structure and values of the XML data. The XML schema defines the name of the element, element data types, values for the specific tags with latest date to know as and when the data has been updated. The XML Import in WBARS helps to import the Table 1 information with corresponding XML tag and appropriate schema values.

Glossary

NHTF	National Housing Trust Fund
PSH	Permanent Supportive Housing
LIH	Low Income Housing
FT	Fulltime
HUD	Department of Housing and Urban Development (HUD)

XML Schema				
Element Name	Element Type (format)	Required?	Values	Updated/New
